CBER’s Indexes of Nevada Economic Activity

Coincident Index Components

- Nevada Taxable Sales
- Nevada Gross Gaming Revenue
- Nevada Nonfarm Employment

Leading Index Components

- Nevada Initial Claims for Unemployment (inverted)
- Real 10-Year Treasury Rate (inverted)
- Nevada Housing Permits
- Nevada Commercial Permits
- Nevada Airline Passengers
- Standard & Poor’s Stock Market Index

The CBER Nevada coincident and leading indexes use the Department of Commerce index construction method. The CBER Nevada coincident index measures the ups and downs of the Nevada economy, while the CBER Nevada leading index provides an indication for the future direction of the coincident index. The coincident index provides the benchmark series that defines the business cycle or reference cycle in Nevada. The leading index then tracks the economy relative to that reference cycle. The coincident index peaked in February 2007 and then fell dramatically through June 2010. Prior to the Great Recession, identified by the benchmark Nevada coincident index, the Nevada leading index peaked in November 2005, 14 months before the Nevada coincident index peaked. Then, the Nevada leading index troughed in May 2009, 13 months before the Nevada coincident index troughed. All series are seasonally adjusted (SA). A full description of the methodology used to construct the indexes can be found at: [http://cber.unlv.edu/publications/nvindices.pdf](http://cber.unlv.edu/publications/nvindices.pdf).
The CBER Nevada coincident index increased month-over-month and year-over-year.

The Nevada coincident index increased by 0.2 percent from May 2018. Both gross gaming revenue and nonfarm employment ticked up by 0.1 and 0.2 percent, respectively. Taxable sales, however, did not change from the previous month.

The Nevada coincident index jumped higher year-over-year, rising by 3.0 percent from June 2017. Growth of gross gaming revenue leads the increase, rising by 4.4 percent from the previous year. Taxable sales and nonfarm employment also rose by 3.8 and 2.9 percent, respectively, from June 2017.

The Nevada leading index decreased by 3.3 percent month-over-month. On the positive side, initial claims for unemployment (inverted), the ten-year real Treasury yield (inverted), housing permits, and the S&P 500 increased, rising by 3.5, 0.2, 8.4, and 1.5 percent, respectively, from May 2018. Commercial permits, however, fell by 43.9 percent month-over-month. Nevada airline passengers also dropped by 0.2 percent from the previous month.

On a year-over-year basis, the index fell by 1.1 percent. Commercial permits dropped by 32.9 percent year-over-year. Initial claims for unemployment (inverted), the ten-year real Treasury yield (inverted), housing permits, Nevada airline passengers, and the S&P 500, however, increased by, 6.8, 0.4, 3.3, 2.9, and 13.2 percent, respectively, from June 2017.

CBER’s Indexes of Southern Nevada Economic Activity

The CBER Southern Nevada coincident and leading indexes use the Department of Commerce index construction method. The coincident index measures the ups and downs of the Southern Nevada economy. The leading index provides a signal about the future direction of the coincident index. The coincident index peaked in February 2007 and then fell dramatically through June 2010. Prior to the Great Recession, identified by the benchmark Southern Nevada coincident index, the Southern Nevada leading index peaked in September 2005, 16 months before the Southern Nevada coincident index peaked. Then, the Southern Nevada leading index troughed in May 2009, 13 months before the Southern Nevada coincident indexed troughed. Finally, both the CBER Southern Nevada construction and tourism indexes also use the Department of Commerce index construction method. All series are SA.

Note: CC = Clark County
The CBER Southern Nevada coincident index rose both month-over-month and year-over-year. The Southern Nevada coincident index ticked up by 0.3 percent from May 2018. Both taxable sales and nonfarm employment increased by 1.3 and 0.3 percent, respectively, from the previous month. Gross gaming revenue, however, dropped by 0.5 percent month-over-month.

On a year-over-year basis, the index increased by 3.1 percent. The strong upturn in taxable sales leads the increase, up by 6.0 percent. Both gross gaming revenue and nonfarm employment also rose 3.7 and 3.0 percent, respectively, from June 2017.
The CBER Southern Nevada leading index flat month-over-month, but rose year-over-year.

The Southern Nevada leading index did not change from May 2018. On the positive side, Initial claims for unemployment (inverted), the ten-year real Treasury yield (inverted), housing permits, and the S&P 500 increased, rising by 3.5, 0.2, 8.3, and 1.5 percent, respectively, from the previous month. Both commercial permits and McCarran Airport passengers, however, fell by 34.5 and 0.1 percent, respectively, month-over-month.

On a year-over-year basis, the Southern Nevada leading index climbed by 1.1 percent from June 2017. Initial claims for unemployment (inverted), the ten-year real Treasury yield (inverted), housing permits, McCarran Airport passengers, and the S&P 500 rose by 6.8, 0.4, 19.7, 2.6, and 13.2 percent, respectively, year-over-year. Commercial permits, however, dropped 42.8 percent from June 2017.
The Southern Nevada construction index ticked down month-over-month, but rose year-over-year.

The Southern Nevada construction index dropped by 0.4 percent month-over-month. On the positive side, both construction employment and housing permits increased, rising by 0.4 and 8.3 percent, respectively, from the previous month. Commercial permits, however, decreased, falling by 34.5 percent from the previous month.

On a year-over-year basis, the construction index rose by 1.3 percent. The strong growth of construction employment and housing permits lead the increase, rising by 9.1 and 19.7 percent, respectively, from June 2017. Commercial permits, however, dropped by 42.8 percent, year-over-year.
