## **CBER's Southern Nevada Coincident Index Increases for Third Straight Month**

Ryan T. Kennelly

CBER's Southern Nevada Coincident Index rose in July 2014 for the third straight month, benefitting from gains in both of its components. Las Vegas nonfarm employment increased by 0.49 percent for the month and is up strongly year-over-year by 3.30 percent. Las Vegas household employment experienced slightly smaller monthly gains, rising by 0.36 percent, and it is only up 2.15 percent from its level last year.

Changes in the rest of CBER's indexes for Southern Nevada were as follows:

- CBER's Southern Nevada Leading Index increased for the month, and it is faring better than in July 2013.
- CBER's Clark County Business Activity Index rose in July and is above its level from last year.
- CBER's Clark County Tourism Index experienced losses for the month, but it is up from last year.
- CBER's Clark County Construction Index increased for the month and remains up year-over-year.

### *CBER's Coincident and Leading Indexes of Southern Nevada Economic Activity*

*CBER's Southern Nevada Coincident Index represents the current state of the Southern Nevada economy using two series that measure Las Vegas Metropolitan Statistical Area employment. CBER's Southern Nevada Leading Index uses local, regional, and national variables to predict movement in the coincident index four to six months in advance.*

*For the Great Recession, the coincident index peaked in January 2008 and reached its lowest point in September 2010. The leading index peaked in July 2007—six months before the coincident index and reached its bottom in February 2010—seven months before the coincident index started recovery.*
